

aQua tight

Welcome to the NEW FLOW

MANTIS

THE NEW FACIAL TECHNOLOGY

aQuatight is a revolutionary device for deep skin cleansing, capable of gently removing sebum, blackheads and dead skin cells without trauma. It promotes epidermal renewal while providing nourishment and moisture.

3

TECHNOLOGIES

AQUA-PEELING

with sequential acids + simultaneous suction

monopolar and bipolar **RADIOFREQUENCY**

alternate-frequency **MESOPORATION**

- The **FIRST STEP** involves deep skin cleansing using sequential acids combined with simultaneous suction. This combination harnesses the power of AHAs (alpha-hydroxy acids) and BHAs (beta-hydroxy acids), working in synergy with moisturising, antioxidant and soothing agents, carefully balanced to optimise results.
- In the **SECOND STEP**, monopolar and bipolar radiofrequency is used to deeply stimulate collagen and elastin production. This controlled energy safely generates heat, eliminating the risk of thermal damage to the surrounding tissues. Its targeted action delivers a smoothing effect and visibly rejuvenates the face, neck and décolleté, ensuring long-lasting results.
- In the **THIRD STEP**, mesoporation with alternating-frequency technology facilitates the deep penetration of hydrophilic active ingredients through intracellular channels in the skin barrier. The device features a graphite plate, ensuring an optimal treatment experience for the customer. This enhances the permeability of active ingredients, allowing an effective and high-performance application completely free from any physiological sensations.

WATER SHINING SYSTEM

Aqua Tight is equipped with two high-quality, autoclavable surgical steel tips designed for superior performance.

Thanks to their structure and reusability, these TIPS completely eliminate the need for single-use plastic accessories, significantly reducing environmental impact and offering an eco-sustainable alternative.

MAXI TIP

MINI TIP

Available in two sizes, they ensure the effective treatment of both broad facial areas and targeted zone.

Be GLOW with the NEW FLOW

FORMULAS

FORMULA A - AHA

AHA-based formula (glycolic acid + lactic acid)
for water-soluble exfoliation

Evens out skin tone, reduces wrinkles,
moisturises, balances pH, improves radiance.

FORMULA B - BHA

BHA-based formula (salicylic acid)
for oil-soluble exfoliation

Antibacterial, anti-inflammatory, penetrates
clogged pores, provides deep cleansing.

FORMULA C - TON

Vitamin C + Vitamin E-based formula
for an intense moisturising and antioxidant action

Repairs and prevents the formation of
wrinkles and dark spots.

BOOSTS FIRMNESS AND RADIANCE

with visible results in just 20 minutes

Mantis Care System

Our remote technical support

Remote assistance allows Mantis technicians to interact with devices without the need for on-site visits.

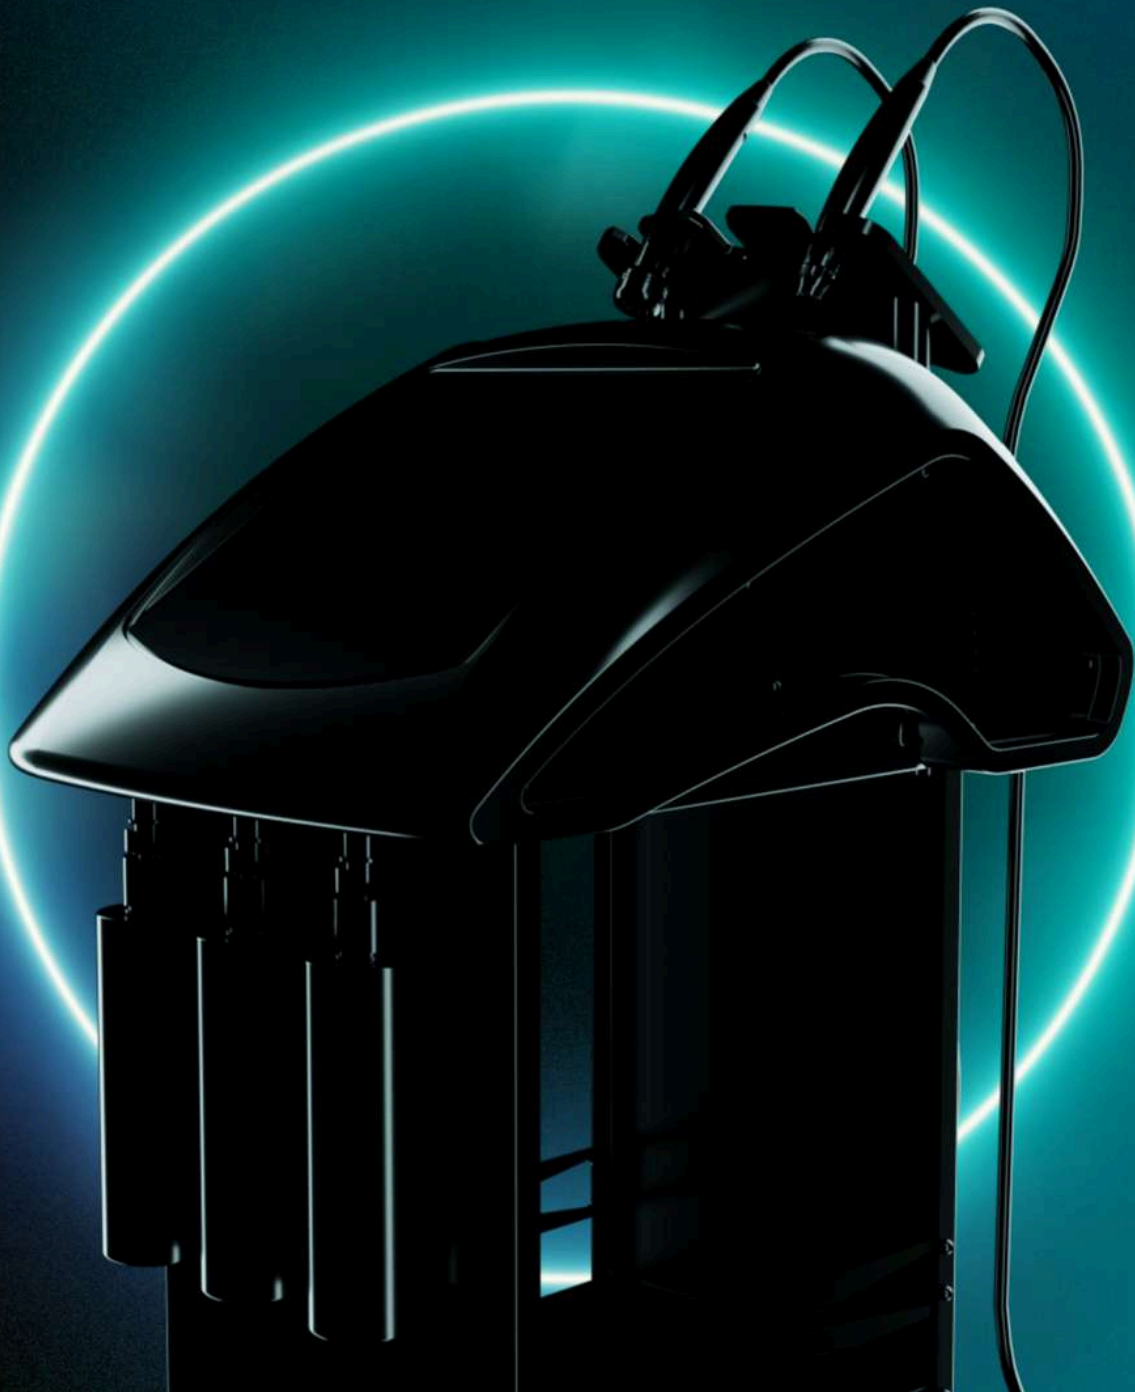

This support mode ensures continuous supervision and allows for rapid, effective action to address any technical situations.

Wi-Fi Technology

Dual Wi-Fi / Ethernet connection for rapid assistance!

This technology enables real-time detection of any changes in device performance, ensuring prompt and attentive support.

Mantis Cloud

Digital innovation in the service of well-being

The Mantis Cloud virtual platform gives you access to the data of all your devices.

Stay connected!

Through your virtual platform, you can:

- request assistance and receive guidance to quickly deal with any situation.
- view completed treatments, analyse detailed statistics and prevent overuse or underuse of your equipment.
- monitor maintenance alerts to ensure the optimal performance of your devices.
- stay connected via Wi-Fi to receive technical notifications and automatic system updates.
- receive support and efficiently manage all your Mantis devices.

WE DRIVE YOU ...

... into the new era of Mantis, where science, technology and passion come together to create innovative solutions for the medical-aesthetic field.
