

# LASER EPILATION

*Welcome to the NEW ERA*

**MANTIS**

## EVEN MORE EFFECTIVE EPILATION

The Black Mamba EVO diode laser is the best ally in laser epilation, **for all phototypes.**

### HANDPIECES

**Powerful, light, fast!**

**Mantis technology in your hands**

- Spot size covering an area of **2cm<sup>2</sup>**.
- Possibility of configuring a 2nd handpiece with an area of **1cm<sup>2</sup>**.
- High performance and **extremely light weight** make treatment a unique experience for the operator.

**EPIL-1 / 1cm<sup>2</sup>**

**EPIL-Supreme / 2cm<sup>2</sup>**

### COOLING

**The most highly efficient  
DYNAMIC COOLING SYSTEM**

- Black Mamba EVO maintains maximum performance throughout the treatment, guaranteeing the **same temperature** from the first to the last shot on the epidermis.
- Thanks to its unique TMS and ACS technology, the Black Mamba EVO guarantees virtually unlimited treatment times in all **environmental conditions.**

**TMS**  
Thermal Management System

**ACS**  
Active Cooling System

**BLACK  
MAMBAEVO**

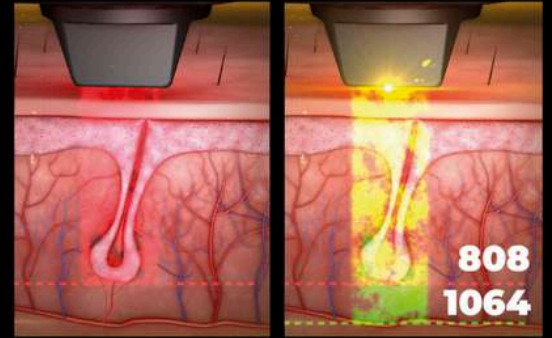

## DOUBLE WAVELENGTH

Maximum performance in a single handpiece acting on two depth levels.

This allows a wider range of customers to be treated at all times of the year, on every phototype.

- **Wavelength 808** is the gold standard, ensuring proper absorption of melanin and deep action in the follicle.
- **The 1064(YAG) wavelength**, having a lower absorption of melanin, guarantees deeper photo-epilation, reaching not only the bulb but also the papilla.

## High power

Power up to 2000 Watts with an extremely short pulse duration, ideal for effective treatment of even the finest hair, such as facial hair.

## MMC

Mantis Media Center

The Mantis Media Center is a digital space designed to offer interactive support to facilitate the management and enjoyment of **Mantis multimedia content**. Specifically designed to support the operator during work activities.

INNOVATIVE SAFE POWERFUL EFFICIENT FAST

# EPIRATION NO LIMITS

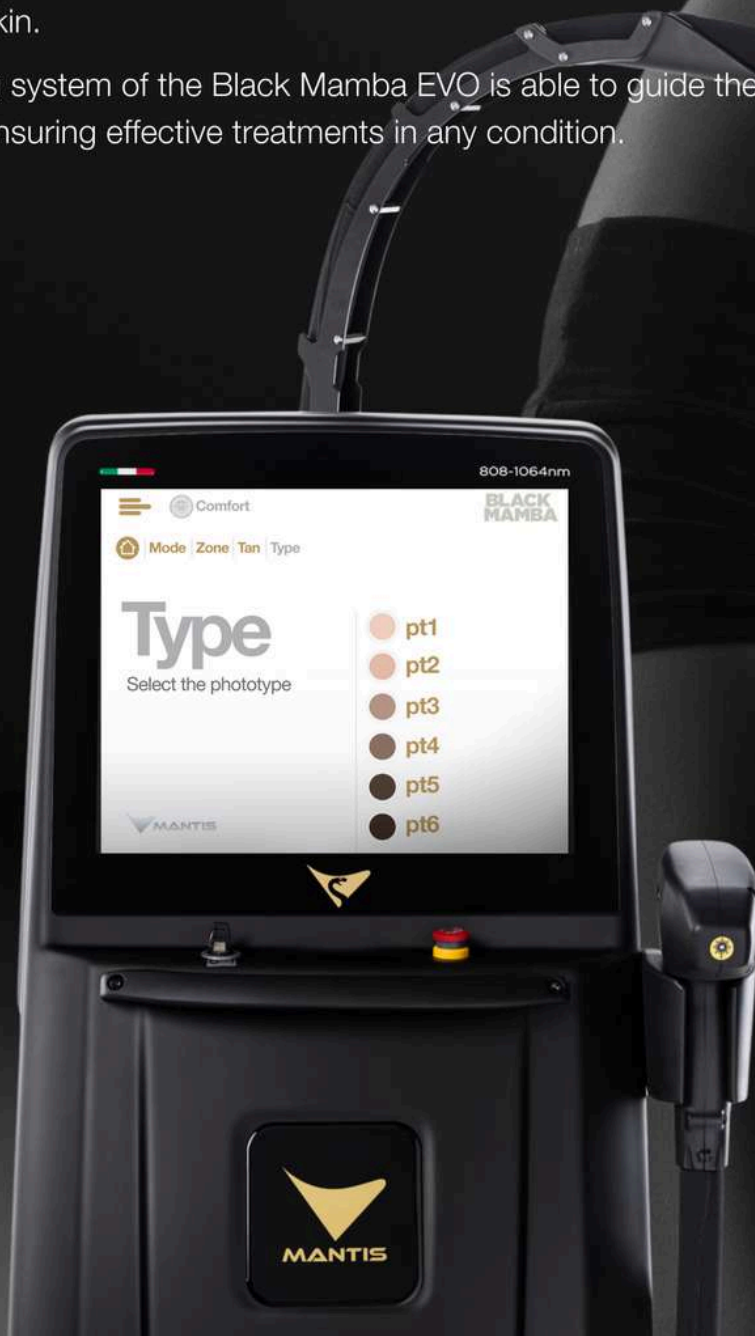

The Black Mamba EVO technology is one of the most modern and safest technologies for permanent hair removal. It guarantees concrete results even during the **SUMMER SEASON!**

## Safe treatments on all phototypes!

The addition of the 1064(YAG) wavelength allows less absorption by melanin to ensure a deeper action. This feature allows safe and perfect hair removal even on darker phototypes and tanned skin.

The operating system of the Black Mamba EVO is able to guide the operator through an assisted anamnesis, ensuring effective treatments in any condition.

## Mantis Care System

**Our remote technical support**

Remote assistance allows Mantis technicians to interact with the equipment without the need to physically visit the site. This remote mode ensures constant supervision of the devices and allows effective intervention to solve any technical problems.

## Wi-Fi Technology

**A dual Wi-Fi / Ethernet connection for fast support!**

This technology enables real-time detection of any device malfunctions, ensuring attentive and rapid support.

## New Display

**Larger, practical, intuitive**

- 17-inch Ultra HD touch screen display.
- Detailed graphic interface for immediate reading.

## Mantis Cloud

Digital innovation in the service of well-being

The Mantis Cloud virtual platform gives you access to the data of all your devices.

## Stay connected!

Your virtual platform allows you to:

- request assistance and receive a prompt support.
- view the treatments carried out by your equipment, analyse detailed statistics and prevent excessive or insufficient use.
- monitor maintenance alerts to ensure optimal operation of your devices.
- remain connected to Wi-Fi to receive technical communications and automatic equipment update notifications.
- have control over all your Mantis devices.

## WE DRIVE YOU ...

... into the new era of Mantis, where science, technology and passion come together to create innovative solutions for the medical-aesthetic field.
